## Ceiling-Mounted Speaker

Conventional ceiling-mounted speaker

## Pursuing uniformity of tone quality

A special diffuser radiates sound in both the downward and horizontal directions. While optimizing the sound level directly under the speaker, the diffuser delivers sufficient sound levels in the higher frequencies to positions away from the speaker, thus ensuring the delivery of clear sound.

## Simple, easy installation

Wide-directional design is employed to cover a wide area with

a small number of speaker units, thus ensuring cost reductions during installation work. Furthermore, quick connection terminals are employed, ensuring one-touch connection of cables without using any tools. The speaker panel (option) is of a spring type, and all you have to do is to hang it in the desired place.

## Economical efficiency during remodeling

When remodeling your shop, you can change the interior atmosphere just by replacing the speaker panels.

## Speaker Volume Controllers

- 6 W/30 W/60 W transformer type. Broad wattage range adapts flexibly to wattage fluctuations while work is underway.
- 5-level sound volume adjustment. Addition of -18 dB level allows use in quieter environments.
- One-touch snap on insulator. For easier connecting and insulation.
- Equipped with protective back cover to provide a safer working environment.
- Uses one-touch snap on terminals equipped with release buttons.

\* Requires solid copper wire cabling ø0.8 mm - ø1.6 mm.
